FGAM Update January 2023

Insights and information from Dr. William R. Nelson, PhD, Chief Investment Officer of Financial Gravity

In this update, Dr. Nelson will provide key insights into the inherent wisdom of controlling the controllable, a discipline aimed at maximizing the long-term returns available from constant exposure to the equity market.

Dr. Nelson will also address a top concern of investors (indeed, of all Americans): inflation. The market has a mechanism that reveals the sentiment of market participants regarding inflation, and you may find some relief in what it reveals.

This update also provides a deep dive into the realities of mutual fund investing. Despite their popularity, mutual funds often underperform passive investing strategies, and Dr. Nelson will explain the various causes for this failure. Even seasoned investors may be surprised by what they'll learn.
